

# PixLite E4-S Mk3 Quick Start Guide

## 1 - Physical Connections

In order to connect to the PixLite E4-S Mk3, there must be a working power supply between 5 – 24Vdc connected to the power input, which is the small screw terminal marked "+" & "-". The screws should be loosened for wire insertion and then tightened again, providing a highly robust and secure connection. Polarity for the connector is clearly marked on the lid.

# 2 - Startup & Network Connection

## 2.1 - Startup

Upon startup for the first time, the PixLite will be using DHCP/AutoIP and the status LED will flash green, indicating normal operation. If you have a router, then DHCP will automatically assign an IP address to both the PixLite and your computer.

No Router? No Problem. Simply connect the PixLite directly to your computer, and open Advatek Assistant 3.

## 2.2 - Advatek Assistant 3

The easiest method for connecting to the PixLite E4-S Mk3 is by launching Advatek Assistant 3 to discover the device. Advatek Assistant 3 can be downloaded and installed, using the URL below:

[www.advateklights.com/advatek-assistant-3](http://www.advateklights.com/advatek-assistant-3)

Any active PixLite devices on the network will automatically be discovered and displayed. Double click to open its Management Interface, and begin configuring your new PixLite E4-S Mk3.

Figure 2: Advatek Assistant 3

The screenshot shows the Advatek Assistant 3 application window. The title bar reads 'Advatek Assistant 3'. Below the title bar is a menu bar with 'File', 'Edit', and 'Help'. The main area is titled 'Devices' and contains a 'Clear' button and a search icon. A table lists discovered devices with columns for Nickname, Model, IP, MAC, and Firmware. Each row has a double-click icon on the left and a three-dot menu icon on the right.
